Newly submitted claims 71-130 are directed to an invention that is independent or distinct from the invention originally claimed for the following reasons: The new claims 71-130 replace the Br₂ in the originally filed claims with BrCl. The claims as amended would produce chlorosulfamate once BrCl reacts with sulfamate as argued by the Applicants in paper filed 1/21/09, whereas the Br₂ would only yield bromosulfamate once Br₂ reacts with sulfamate. The substitution of BrCl for Br₂ produces a new intermediated, chlorosulfamate, not observed using the Br₂. For this reason the new claims present a new concept from the originally filed claims.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 71-130 are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.
